Personal Statement

A strong, confident & empathetic leader that enjoys working independently as much as being part of a team. Spending the last decade working professionally on the internet in all but the most extreme scales. Always carrying a professional attitude while maintaining a friendly and approachable demeanour. Consistently striving for the best but aware that the Engineers/PM Triangle means compromises are intrinsic to engineering. Always aiming to develop the working environment, enjoy the job and put a smile everyone's face.

- Strong independent that also enjoys building on the skills of colleagues.
- Varied experience through a range of primary and secondary roles in the industry.
- Select specialisations where necessary to go the extra mile.
- A life backed by IT but not dominated by it.
- Eager & flexible to learn new skills and improve older ones.

Lead Engineer at Wirehive Ltd.

October 2013 - November 2015

Previously a SMB Technical Consultation company, Wirehive were trying to pivot into the Managed Hosting and Services industry. I was brought in to fill out technical experience that was lacking in the company (Windows, Databases, Networking, Automation, etc.) and to help apply the experience that I had gained seeing a Dedipower grow from 10 employees to ~200 through Pulsant. My time was roughly split in thirds with one third spent working on company growth, one spent on assisting and training colleagues and one spent working on 'VIP' customers.

My time spent on company growth was distributed between technical and consultation. Technical mainly consisted taking the systems that were in place and working them to scale for the next 5+ years of projected growth. This included exposing these systems via programmable APIs and using them for automating the provisioning and support workload for both the new and current customers. While I was there my skill-set was also made available for contracted external consult, specifically for networking, programming and database work which were typically based on Cisco, PHP/C# and MySQL/MSSQL but also branched out to other disciplines and technologies when required. My time assisting the Technical Support Team included building out their experience in a variety of technologies, assisting colleagues and providing guidance on growing the team.

- Automated the Provisioning Process and provided tooling for a variety of other processes.
 - Upgraded various systems for the next 5+ years of projected growth.
- Supported the largest accounts and worked to build out the Technical Team.
- Worked with all sides of the business including Sales, Marketing and Account Management.
 - My Accounts included HP, Volume, Race of Champions, Rawnnet, Purple.

Lead Engineer at Pulsant Ltd.

March 2012 - September 2012

Dedipower was sold on to a larger holding company and merged with 3 other privately held Data Center & Support companies. My daily duties morphed from a shop-floor support role to a more consultative and advisory role and eventually the most senior engineer in the conglomerate where I helped with the general technical running of the now largest privately held Data Center and Support company in the country with more than 200 permanent staff.

- Lead Engineer for 200+ company with senior responsibility spread across the company.
- Consulted on technology and structure changes with a strong role in interviewing and training.
- My Accounts included PlayStation, Improve Digital, VE Interactive, Visualsoft & The Royal Household

Senior 3rd Line Support Engineer at Dedipower Managed Hosting Ltd.

December 2007 - March 2012

Initially employed as a Junior Support Engineer, I was surrounded by some of the best engineers I have had the fortune to work with so far in my career. I spent most of my time absorbing everything I could from the people around me and quickly rose through the ranks through a combination of great environment and hard work. When I started with the company it only had <10 employees and I was with it's sale at ~50 employees in the Senior 3rd Line Engineer position. My day-to-day role consisted of Senior Escalation and Technological Consult for hundreds of customers across thousands of servers as well as a Technology Specialist for a variety of specialisations. I personally took care of the companies largest customers and was routinely handed sensitive accounts that required extra care.

- Senior engineer that regularly assumed a Technical Team Leader role as required.
- Advised on and implemented company wide technology changes across large infrastructures.
- My Accounts included Virgin, Carphone Warehouse, Sony, Gyro, Uniservity, Capita & RED

Glynn Technology 6th Form

2005 - 2007

- Senior House member and a member of the school Rugby Team.
- Studied A Levels in Maths, Physics, Chemistry, Philosophy & Psychology.

Glynn Technology Secondary School

1998 - 2005

- Senior House member and regular in the school sports teams esp. Rugby & Athletics.
- A* - C in 13 GCSEs including Double Science, Double Maths, Art & Geography.

Personal Interests

- A keen interest in cooking, specifically contemporary European cuisine but branching east more recently through Asian and Indian cuisines.
- Lifelong dedication to music started with guitar but has moved to electronic styles inc. Producing, Mixing and Recording. with some of my work available on my website.
- Exercise enthusiast and avid cyclist (weather permitting) in the areas surrounding the Epsom Downs.
